Highway Transport

1. What is the condition of the present North Korean highway network? Is war damage still evident on main arterial trunks where evidence of no repair has been made?
2. Is there any evidence of a major construction or reconstruction program actually underway in any sector?
3. Truck movement along existing routes - note type, weight and origin of these vehicles.
4. What types of cargoes are carried?
5. Give latest figures on motor vehicle inventory if available.
6. Are Chinese or Soviet nationals, or both, operating these trucks across the border into Manchuria?
7. Any evidence of major rebuilding of highway bridges in any sector?
8. What is the present traffic ^{volume} ~~capacity~~, number of vehicles and tonnages per day moved, either regional or total, (annual figures, if available, are very important.)

Water Transport

Water transport, both inland and ocean is relatively undeveloped. Therefore, any information obtained should be done so with both the guide type requirements as set forth in the requirements manual entitled, "Comprehensive Economic Requirements for Communist China" and the overall comprehensive requirements for the entire Soviet Bloc.

However, we are currently interest in one aspect of this mode of transportation; namely, clandestine shipping or smuggling activities between North Korea and any other Bloc or non-Bloc country. In this respect, activities of the North Korean fishing fleet should be ascertained whenever possible with the view that clandestine shipping might be taking place.

Civil Air Transport

1. Give details of organization of the Government control of civil aviation in North Korea.
2. Give provisions of the agreement which marked Soviet withdrawal from ownership in the joint civil air carrier SOKAO.
3. What is the extent of foreign influence on the air carrier, - USSR? Chinese?
4. Give headquarters, aircraft inventory, number and nationalities of personnel, routes flown.
